

I subscribe to XM Radio, and I understand the NAB is trying to stop XM's broadcast of weather and traffic. I pay for this service, and feel that XM has every right to provide this service. I no longer listen to over-the-air radio, primarily because of repetitious play lists and 33% commercial / 66% other content programming. Please don't let the NAB remove this service from either of the satellite radio service providers. Thank you, John P. Foster
